Test: Cerebellar hypoplasia (CH)

Result: CLEAR

Results summary:

Gene	c.2839del	Inheritance	Zygosity	Detection method
RELN	Not detected	Autosomal recessive	Homozygous	Sequencing

Interpretation:

Tested mutation was not detected in animal with „clear“ result. Animal tested as clear has wild-type allele in homozygous state (i.e. two pairs of healthy alleles). It will not develop disease caused by tested mutation.* It will pass only wild-type allele to its offspring. *Test excludes only tested mutation but not possible unknown mutations or factors that can lead to similar condition/symptoms.
